REFINERY LP MODELLING/PLANNING CONSULTANT SOUTH EAST

£50 TO £85,000PA

REFINERY/PETROCHEMICAL CONSULTING

Our client enjoys a pre-eminent position within the downstream consulting sector from where it provides valued advice and insight on a wide range of commercial and technical issues associated with refining and petrochemicals. The organisation is now urgently looking to identify an experienced LP Modelling/Refinery Planning Consultant to work within its highly regarded commercial support and development group. The successful candidate will offer advice and guidance to clients on improving the accuracy and sophistication of their LP models, undertake LP studies and run programmes for clients, investigate the suitability of alternative LP software, offer performance benchmarking, etc.

PETROCHEMICALS CONSULTANT NORTH WEST

£35 TO £65,000PA

DOWNSTREAM / PETROCHEM CONSULTING

Our client enjoys a pre-eminent position within the downstream consulting sector from where it provides valued advice and insight on a wide range of business and technical issues associated with petrochemicals and refining. The immediate need is to identify an engineer with significant experience of petrochemical operations or consulting. The successful candidate will work closely with BTX, olefin, and ammonia/syngas producers looking to improve profitability, output and investment decision making and planning. Candidates should be capable of conducting investment screening studies and licensee options reviews, undertaking de-bottlenecking/profit improvement exercises, evaluating and costing technology/facility transfer programmes, etc.

PROJECT/PROPOSALS DEVELOPMENT ENGINEER SURREY

£47 TO £65,000PA

PROCESS TECHNOLOGY

Our client is a major developer, supplier and operator of licensed technology to the oil & gas, refinery, petrochemical and gasses industries. The organisations units are the prime technology choices for numerous blue chip customers and are supported from an O&M perspective by our client over the terms of the license. The position supports a major business group operating within the petrochemical, syngas and hydrocarbons markets by developing competitive offerings for its licensed technology across a broad range of territories including Russia, Europe, Middle East, India and Africa. The job holder will lead and co-ordinate multi disciplinary teams in developing estimates on bids in conjunction with parallel departments such as legal, operations, engineering, etc.

PRINCIPAL PROCESS SYSTEMS ENGINEER SURREY

£45 TO £62,500PA

PROCESS TECHNOLOGY

Our client is a major developer, supplier and operator of licensed technology to the oil & gas, refinery, petrochemical and gasses industries. The successful candidate will provide discipline drive to a key technology and product group offering plants and units to third party partners and for internal retention and operation. Specific duties will include the development and maintenance of generic business P&ID's to support product re-use, leading HAZOPs on the generic portions of plant scope, supporting the development of proposals, P&ID's including man hour estimates, preparing plant operating procedures, supporting the commissioning team as a member of the team on site, etc.

BUSINESS DEVELOPMENT MANAGER UAE

£60 TO £85,000PA + BENEFITS, ACCOM & HEALTHCARE

PETROCHEMICAL CONSULTING

Our client is a major global consultant providing a full range of bespoke client advisory services including M&A, due diligence, strategic planning, yield benchmarking and improvement, techno economic assessment, relocation estimates, license option review, patent infringement and so on for petrochemicals, refinery and utility independents and majors throughout the Gulf region. Already well established in the Gulf, the business is poised for significant expansion over the next 2/3 years and is now looking to identify a Business Development Specialist, with significant technical and commercial understanding of the refinery, petrochemicals and energy sectors,

PROCESS/PROJECT ENGINEER EAST YORKSHIRE

£30 TO £45,000PA

PHARMA/FINE CHEMICALS

Our client is a major healthcare company manufacturing pharmaceutical powders and precursors from a part GMP/FDA regulated site. The site is investment rich and expanding on the back of growing export demand and incoming product transfer. Internal promotion has created a vacancy for an experienced chemically biased project engineer ideally with experience acquired in the API, healthcare, food or related industries. This exciting role encompasses all aspects of project delivery including scoping, the development of design and functional specifications from business cases, estimating, issuing technical specifications and enquiry documents, evaluating, appointing and controlling vendors, etc.

BUSINESS DEVELOPMENT/PROPOSALS MANAGER NORTH WEST OR MIDLANDS

£45 TO £55,000PA + CAR & BONUS

MAJOR ENGINEERING SERVICES

Our client is a major engineer providing full multi disciplinary study, design and construction management solutions for a range of end users, investors, governmental and regulatory agencies. The business is principally "client side" with installation executed by appointed subcontractors. Its span covers a range of key industries including power and utilities, waste management, chemical manufacturing, energy including LNG, LPG, pipelines and storage/terminals, nuclear and food/pharmaceuticals. This is a highly rounded, complete role incorporating both opportunity identification and solution presentation and also the development of the prospect through the detailed tendering and contract negotiation stages including overseeing the timely submittal of all technical and commercial data and documentation.

INTERMEDIATE REFINERY CONSULTANTS SOUTH EAST

£30 TO £60,000PA + BENS

REFINERY/PETROCHEMICAL CONSULTING

Our client is one of the world's most successful petroleum and petrochemical consultants. Operating out of 10 international centres, the company provides a broad array of techno/economic advise to operating companies, banks, regulatory bodies and engineers, covering diverse topics such as due diligence, yield benchmarking, profit improvement, de bottlenecking and optimisation, technology evaluation/replacement, license technology review and selection and so on.

PRINCIPAL/LEAD SAFETY ENGINEER LONDON

£85 TO £92,000PA + BENEFITS OR CONTRACT

EPC CONTRACTING

Our client is a major, international contractor and one of the few still taking full EPC completion responsibility for the construction of world class greenfield developments out of London. The organisation has recently been awarded the contract to build a landmark \$B plus, multi product onshore plant in the Middle East. As a consequence, a proven lead safety engineer to take full responsibility for all aspects of safety design on the project is sought. Ensuring that all statutory and project specific design HSE requirements are accounted for, the job holder will lead/chair Hazops reviews, oversee the design of loss prevention systems such as those for fire protection detection, manage the development of safety cases and emergency shutdown policy and procedures, etc.

SAFETY ENGINEER CENTRAL SCOTLAND

£30 TO £43,000PA + PENSION & PROFIT SHARE

SAFETY CONSULTING

Our client is part of a major risk and technical safety consulting and training company that assists clients in the major hazard industries including nuclear generation and processing, oil and gas, refining and petrochemicals, rail and marine transportation and defence. With a good understanding of the technical, engineering and/or operational issues fundamental to safety management, job holders will provide a range of advice to clients that could include preparing and managing qualitative and quantitative risk assessments, Hazops, FMEA, design basis assessment, ALARP assessment, safety case writing, producing formal technical reports, HSE cases and other project deliverables, etc.

SENIOR & PRINCIPAL SAFETY ENGINEERS NORTH WEST

£45 TO £65,000PA

PROCESS SAFETY CONSULTING

Our client is a dynamic and rapidly expanding Safety & Risk consultancy with 4 UK offices. Focusing on the oil & gas, refining, LNG and chemical markets internationally, this business is currently enjoying significant levels of enquiries and awards. As a consequence, the organisation is looking to strengthen and expand the structure of its senior team to include 2 client facing principals and 3 additional executive senior engineers capable of leading significant work packages. The team covers most of the usual services and methodologies including ATEX/DSEAR, the whole Hazop life cycle, QRA, safety case development, probabilistic assessment work, fire and explosion analysis, etc.
